

An aerial photograph of a vast solar farm. The solar panels are arranged in neat, parallel rows that stretch across a flat, open landscape. The panels appear as a grid of dark, rectangular shapes, with some rows showing a lighter, possibly reflective or different material. The overall scene is captured from a high angle, looking down on the installation. The text is overlaid on the upper portion of the image.

Put aside the high power and efficiency as well as high bifacility, TOPCon's excel in low irradiance performance stands it out in rooftop
